LABOR PAYMENT SCHEDULE	37
------------------------------	----

WARRANTY EXPLANATION

The word "Full" is legal language under the Magnuson Moss Warranty Act. It means no charge to the customer. Parts, labor, travel and other charges are provided in the customer's home at no charge.

FULL WARRANTY "Limited" means anything other than full. The replacement part is furnished no charge by Goodman Company, L.P. FOB Fayetteville, Tennessee. The customer may pay all other charges.

LIMITED WARRANTY Unless otherwise indicated, warranty begins at the date of the original purchase. It applies only to original installation and to normal use within the United States and Canada.

Product must be installed in accordance with manufacturer's specifications.

In order to decipher date of manufacture, the serial number can be read in the following way. For products manufactured before 1986, the following coding was used.

First Character	Second Character
B = 1961, 71, or 81	A = January
L = 1982	B = February
A = 1983	C = March
C = 1984	D = April
K = 1985	E = May
	F = June
H = 1976	G = July
O = 1977	H = August
R = 1978	J = September
S = 1979	K = October
E = 1980	L = November
	M = December

For example, LC87376457 was manufactured in March, 1982.

Beginning in January, 1986, a new serial number system was introduced. For example, 8601078436 would be read 86 corresponding to the year, 1986, and 01 corresponding to the month of manufacture, January.

ASURE™ EXTENDED SERVICE PLAN

ASURE is an extended service plan that doesn't replace the warranty, but adds additional parts and labor coverage to the warranty. Only authorized Amana® Brand HVAC dealers and servicers can set and provide service under ASURE Extended service contracts. ASURE is available only in the first year of ownership. The customer who purchases an ASURE plan will receive a written contract indicating the terms of the coverage.

- ASURE labor coverage is effective on the thirty-first (31st) day after installation if purchased during that thirty (30) day period; otherwise, it is effective thirty-one (31) days after the contract date if submitted more than sixty (60) days after the installation date.
- Customer has 12 months from installation to purchase ASURE.

Repairs must be completed according to Amana® brand HVAC repair procedures. Amana® brand HVAC parts must be used in all repairs. ASURE pays recommended "LIST" price for qualifying parts that are replaced and labor by schedule classification at rate shown on authorized service agreement negotiated with each distributor by the dealer. The Labor Payment Schedule, beginning on page 37, explains labor classification under the ASURE program. Both refrigerant and refrigerant recovery are paid in addition to the labor allowance for a qualifying repair.

A customer must not be charged labor for a qualifying part replacement covered by their ASURE contract. They may, however, be charged for overtime, cleaning and maintenance that restores the units operation.

Should you have any questions about selling ASURE contracts or servicing products covered by the ASURE program, please call your Amana® brand HVAC Distributor.
